

TECHNICAL INFORMATION**MAHLE Industriefiltration presents a variety of amafilter elements**

At the parts2clean MAHLE Industriefiltration presents an open filter vessel that demonstrates different amafilter elements, which are all applicable in wet and dry cake discharge.

The 5 ply amafilter pressure leaf elements are standard for usage in vertical and horizontal vessels. The Cricket[®] type elements and the Pulse Tube System elements are only for usage in vertical vessels. Due to the design concepts of these different elements a broad range of applications can be handled with or without using filter clothes.

amafilter elements have been continuously developed in the course of the company's 50 years existence. Our state-of-the-art equipments meet the highest quality standards thus ensuring maximum customer satisfaction.

amafilter, acquired by MAHLE Industriefiltration, offers products and services to the global filtration industry with many years of experience, innovation, and partnering with its customers.

MAHLE Industriefiltration has been producing high-quality industrial filters for fluid technology, dust filtration, and process technology for many years. As an innovative, reliable development partner and supplier all over the world, MAHLE Industriefiltration is your expert partner in all areas of filtration and separation. MAHLE Industriefiltration is an independent service area with its own engineering, production, and sales team, integrated in the MAHLE Group, and thus is backed by the strength of a worldwide market leader. The MAHLE Group is among the top 30 automotive

suppliers globally and is the world market leader for combustion engine components, systems and peripherals. MAHLE employs approximately 45,000 employees in 100 production plants and eight research and development centers. In 2008, MAHLE generated sales in excess of EUR 5 billion (USD 7.3 billion).
